

LOVA RAJU DUNGALA

Software Engineer | Full Stack Developer | Backend Developer

+91 8096042387 | lovarajudungala99@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

2026 CSE (Data Science) graduate with hands-on experience in **Java, Node.js, React.js, and MongoDB**, delivering scalable backend systems and AI-powered tools across two **APSCHE-certified internships** in Full Stack Development and Generative AI (Google Cloud). Solved **570+ DSA problems** (LeetCode 380+, GFG 190+) with strong foundations in OOPs, DSA, DBMS, Operating Systems, and Computer Networks.

EDUCATION

- Vignan's Lara Institute of Technology and Science** Aug 2023 – Jul 2026
B.Tech in Computer Science Engineering (Data Science) | GPA: 8.14/10 Guntur, India

EXPERIENCE

- SmartBridge (APSCHE)** Jun 2025 – Jul 2025
Full Stack Development Intern (MERN)
 - Built a **scalable complaint management system** with role-based access using **Node.js, Express.js, and REST APIs**; implemented **JWT authentication** and optimized MongoDB queries, improving API performance by **20%**.
- SmartBridge (APSCHE)** Oct 2025 – Mar 2026
Generative AI Intern (Google Cloud)
 - Engineered an **NL-to-SQL AI query engine** using Google Cloud **Vertex AI and LLMs**, reducing manual data-retrieval time by **60%**; applied **prompt engineering and RAG** techniques across 240+ hours of applied training.

PROJECTS

- ResolveNow – Complaint Management System** 
Node.js | Express.js | MongoDB | REST APIs | JWT Authentication | Redis
 - Designed a **multi-tenant system** with three-role hierarchy and **12+ RESTful API endpoints** handling **500+ concurrent requests**; improved query speed by **30%** via MongoDB compound indexing and aggregation pipelines.
- Professional Networking Platform – Mini LinkedIn** 
React.js | Node.js | Express.js | MongoDB | REST APIs | JWT | Vercel / Render
 - Built a full-stack platform serving **1,000+ mock user profiles** with **15+ RESTful API endpoints**, secure RBAC, and cursor-based pagination reducing feed load time by **35%**; deployed via **GitHub Actions CI/CD**.
- Blockchain Certificate Verification System** 
Ethereum | Solidity | Web3.js | Node.js | MongoDB | IPFS
 - Architected a **decentralized certificate issuance system** on Ethereum using Solidity smart contracts, cutting verification time from **15+ minutes to under 10 seconds** and reducing manual overhead by **40%** across 500+ test certificates.

SKILLS

- Languages:** Java, JavaScript, Python, SQL, C
- Frontend:** React.js, HTML5, CSS3, Bootstrap, Redux (basics), TypeScript (basics)
- Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Microservices, Spring Boot (basics)
- Databases & Tools:** MongoDB, MySQL, PostgreSQL, Redis (basics), Indexing, Query Optimisation, Git, GitHub Actions (CI/CD), Linux, Postman, Docker (basics)
- Cloud & AI/ML:** Google Cloud (Vertex AI), AWS (basics), Generative AI, LLMs, Prompt Engineering, RAG, Python ML (basics)
- Core CS:** DSA (570+ problems), OOPs, Operating Systems, DBMS, Computer Networks, System Design (basics)

CERTIFICATIONS

- Full Stack Development – MERN Stack (APSCHE, SmartBridge)**
- Google Cloud Generative AI (APSCHE, SmartBridge)**
- Python Foundation Certification**
- Operating Systems Basics**

CODING ACHIEVEMENTS

DSA Practice: Solved **570+ problems** across **LeetCode (380+)** and **GeeksforGeeks (190+)**.
